

6.10 OUTDOOR RINK USAGE

i) PREAMBLE

While the HEO Minor and HEO recognize the need and advantages for more ice surfaces, especially those which provide a level of cost savings to our members, we must ensure that these surfaces are both safe and appropriate for use by our members. While we know that outdoor rinks can be an excellent venue for a team's additional practice time, there are legitimate concerns pertaining to organized games. The following is to serve as a tool for associations, leagues and teams to guide them when considering the use of outdoor rinks.

ii) EFFECTIVE DATE

Rev.0 September 2011

Rev. 1 January 2015

Rev. 2 July 2016

iii) PURPOSE

The purpose of this policy is to provide guidance to our members, associations, leagues and teams on the use of outdoor ice facilities.

iv) GUIDELINES

It will be the association's and league's responsibility to work with their local officiating body when considering an outdoor rink for exhibition, league, playoff or tournament games. Furthermore, the association/league is also responsible for ensuring the outdoor rink is safe for players, team officials, game officials and spectators.

Practices and Non-Organized Games

- i. The outdoor rink must be publically/municipally owned, maintained and insured. Privately owned back-yard rinks will not be insured for HEO sanctioned events. When signing contracts associations are to ensure they are not agreeing to any "hold-harmless" clauses.
- ii. Associations are to ensure the ice conditions, boards, doors, glass/netting, etc., are in good condition prior to using the surface, and that any known deficiencies be brought to the attention of the rink's owner as soon as possible. Non-boarded rinks may be used for practices only provided the activities are non-contact in nature and that every precaution be taken to prevent pucks from leaving the playing surface.
- iii. Associations are to ensure environmental conditions such as weather and lighting are regularly assessed.

- iv. No games/practices are to be played on frozen ponds/rivers whether municipally owned/maintained or not without prior Branch approval. (Note: certain restrictions will exist)
- v. All players must wear full equipment as they would in an indoor arena.

Games

In addition to the previous 5 conditions, the following will also apply for any game to be considered a sanctioned event:

- vi. There must be all required surface markings as in indoor environments, i.e., face-off locations, lines, goal crease, etc.
- vii. There must be regulation size goal nets (6ft x 4ft) which are in good condition.
- viii. There must be an adequate and visible time-keeping device.
- ix. There must be separate and adequate player's bench areas, penalty box areas and time-keeper's area.
- x. There must be, within close proximity of the surface, separate and adequate dressing rooms for each team as well as the game officials.
- xi. There must be, within close proximity of the surface, washroom(s).
- xii. In order for a game to take place, both the /Team and the Game Officials must agree that the ice surface as well as weather conditions are satisfactory.
- xiii. **Exceptions:** Initiation Program (IP) Fun Days do not require game officials; therefore associations would utilize the "practice" guidelines.
